

# EPT

## Energy Potential Technology

An innovative technological platform, able to maximize the active ingredients of natural substances and thus allow a biologically correct interaction with surprising results. EPT technology is a process that guarantee a natural, non-chemical and ecologically sustainable action as it is able to enhance existing substances in nature. It represents significant progress in the food, agricultural, livestock and industrial chemical industries, including the organic product segment and waste disposal. The use of EPT technology can replace the use of many chemical agents and toxic substances, guaranteeing safety and quality, increasing production and respecting the environments.

**PHENOM**  
**NUTRA-SFLOW**

*Nutra-S FLOW is an essential nutrient for the formation of proteins, its formula is based on elemental sulfur in the form of suspension of micro particles enhanced with EPT technology*

### DESTINATION

All types of crops

### FEATURES

NUTRA-S FLOW is composed of a type of elemental sulfur in the form of micro-particles's suspension. This characteristic allows it to be partially absorbed by plants, thus assuming an essential nutritional role for proteins formation. If applied, it can reduce the use of plant protection products and it promote nutritional balance. NUTRA-S FLOW can be applied in soils or in development phases in which it is necessary to stimulate crops nutrition, or when a fungicidal and insecticidal action is required. NUTRA-S FLOW can replace the use of aggressive products. It can be applied alone or in combination with other compatible products.

### RECOMMENDED PROTOCOL

Spray the plants with aqueous solutions at 0.3 to 0.5%  
Customized protocols are available upon request

### COMPOSITION

Elemental sulfur and adjuvants powered by EPT technology.

### PRODUCT FEATURES

Consistency: yellow liquid  
Odor: characteristic  
Packaging: 1-5 liters/1000 Kg Big-Bag  
Shelf life: 1 year

Our products leave no residue and respect crops, livestock and the environment

### ABOUT

We are an Italian company which deals with innovative biotechnologies in agriculture, livestock, food and environment. We work closely with a team of scientists and researchers, whose work focuses on the development of biotechnologies capable of boosting a healthy and safe production, reduce energy consumption in full respect of the environment.
